

STATE OF NEW HAMPSHIRE

OFFICE OF THE GOVERNOR

September 29, 2006

Dear Friends:

I regret that I am unable to join you for today's ribbon cutting ceremony highlighting Technologies for Blind Persons.

People with disabilities, including blindness or impaired vision, have a great deal to offer to our communities, to our economy and to our state. The training offered by Smart Assistive Techonologies provides increased access to employment and education, benefiting many across the state.

It is rewarding to see the many positive changes that have been made over the years. Since 1996, Smart Technologies has been a leader in the field of Assistive Technology - promoting accessibility, independence and opportunity for individuals with disabilities. As a small business offering valuable services to the New Hampshire community, Smart Assistive Technologies has made a positive impact of the lives of many.

Again, thank you for the invitation and congratulations on your success. I look forward to continuing to work with you to strengthen our state.

Sincerely,

John H. Lynch
