Assistive Technology Evaluations for Students and Adults:

AT Evaluations include:

- A review of the student's individual IEP or vocational goals for adults.
- A visit to the school, home or place of work where technology will be used.
- Hands-on exploration of an array of adaptive technology to determine the most effective solutions to increase access to computers, electronic information and print.
- A **comprehensive report** with findings and recommendations for implementation.

Customized workshops are provided for IT staff enabling schools and employers to fully support individuals with disabilities.
